

ENSEMBLE LEARNING

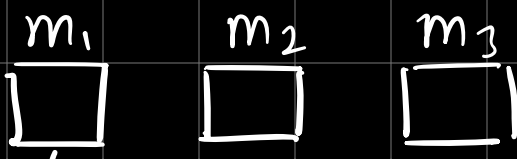

DIFFERENT MODELS:

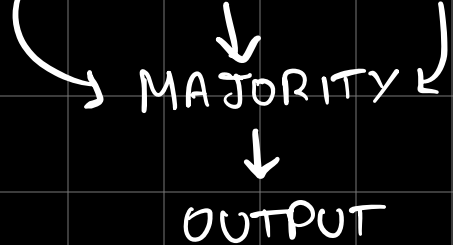

- 1) SAME ALGO, DIFFERENT TRAINING DATA
- 2) SAME DATA, DIFFERENT ALGO

TYPES OF ENSEMBLE LEARNING:

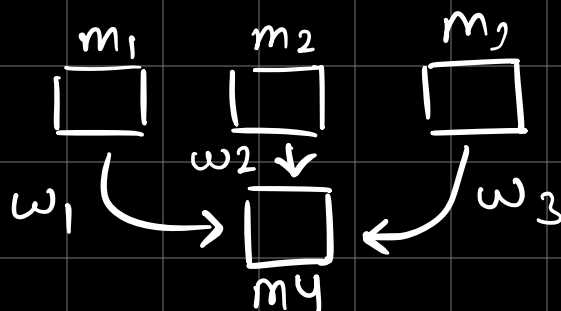

- 1) VOTING
- 2) BAGGING (Random Forest)
- 3) BOOSTING (Adaboost, Gradient Boosting)
- 4) STACKING

VOTING: (Base models are diff. algo)

STACKING :

⇒ m_4 is trained to assign weightage to each base model.

BAGGING : (Bootstrapped Agg)

⇒ SAME BASE MODEL, DIFF. DATA
